

APTO

DANISH DESIGN

2022

APTO

The name of the collection is originally a portuguese word, meaning something being fully adjustable, adaptable, and fastenable.

APTO CLAMP COLLECTION

DESIGNED FOR CIRCULARITY

Be the first to experience the new APTO CLAMP COLLECTION, introducing multifunctional solutions designed for the future! The collection contains more than 10 inspiring designs characterised by remarkable colours, organic shapes, and functional features.

The innovative and timeless collection is designed by the acknowledged design firm Hans Thyge & Co., in close collaboration with manufacturer PJ Production. The collection is the outcome of a visionary dialogue, in which circularity within the changing working environment has been on the agenda. Due to the growing consumerism worldwide, we are forced to incorporate longevity and circularity. We have developed a special-designed multi clamp, providing the opportunity of changing, modifying, and personalising the individually working environment with space optimisation in mind. The multi clamp can easily be relocated from one surface to another, while the remaining objects can be installed in the multi clamp, - effortlessly, silently, and steadily.

DESIGNED BY **HANS THYGE & CO.** // PRODUCED BY **PJ PRODUCTION**

EARTHY LIVING

The philosophy of Scandinavian design is characterized by simplicity, minimalism, and functionality. The style represents the art of living well with a simple home environment that enhances an unencumbered lifestyle.

Earthy living is incorporated in the Scandinavian lifestyle. Bringing nature into the home add atmosphere and impression closer to nature. There is something about bringing live pieces of nature inside that just radiates a healthy energy.

TIMELESS DESIGN

Bring life to the working environment with timeless minimalism invoking serenity and creativity. Choose all elements in one colour to create simplified details. Or mix the different styles for a more personalised impression.

PHILOSOPHY OF DESIGN

The APTO objects are stripped down to their essentials, core purposes, to get the most fundamental, simplified version of the design. But design is more than just good aesthetics. APTO is beautifully designed, but you can not truly appreciate the designs until you start using them. Because it is all the subtle touches, - including all visible and invisible, that make great design. In fact, good design must be experienced rather than seen.

A personal, functional and creative work desk

APTO ADAPT COLLECTION

FEEL AT HOME AT WORK

Working in an office, you spend countless hours at your desk. Why not personalise it with a 100 percent personal setup?

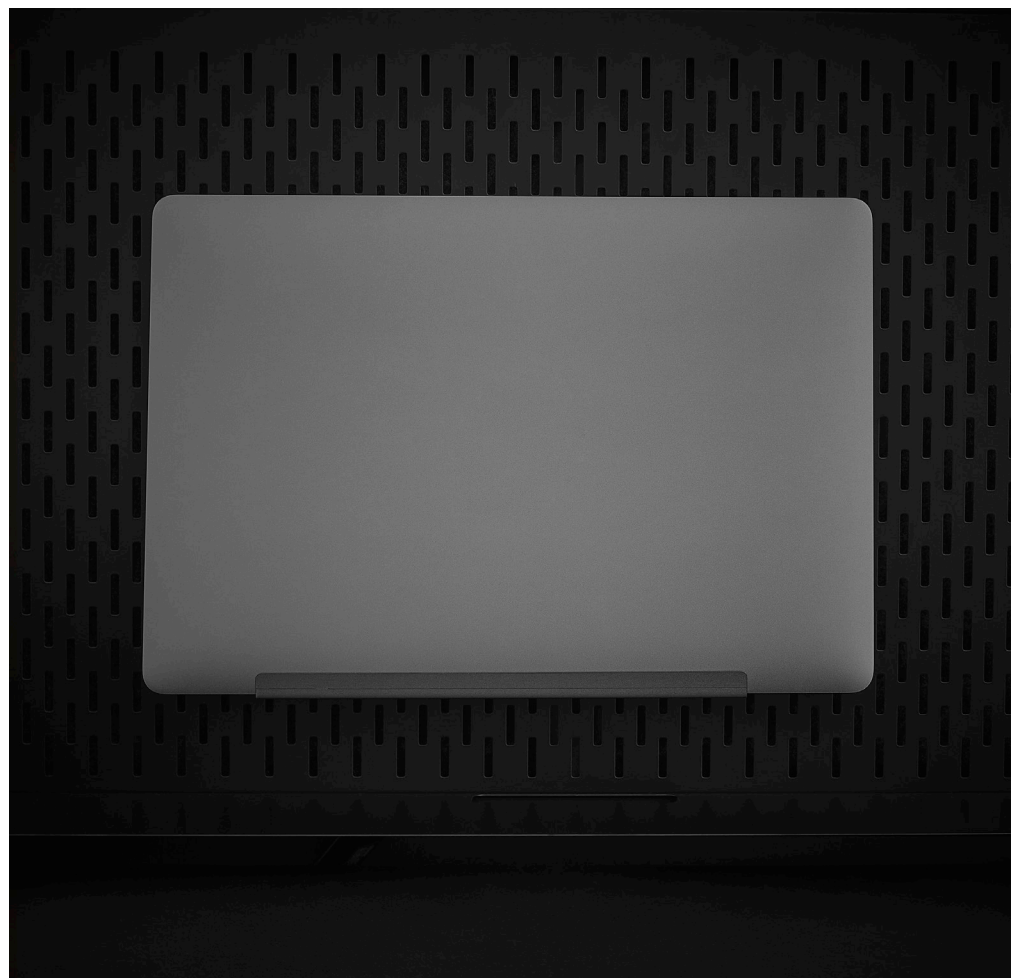

THE APTO ADAPT COLLECTION consists of a rear wall, cable tray, and acoustically treated wall (class b) in one, with associated modules that you can mix and match according to your needs. The idea behind the collection is to create a beautiful, functional and streamlined design that is unique to the individual. That's why every detail has been thought of: from the rounded edges around the back wall, to cable pull-outs and a frictionless way to move around the modules.

The collection can be combined with our other APTO collections, for an extra personal, functional and aesthetic work environment.

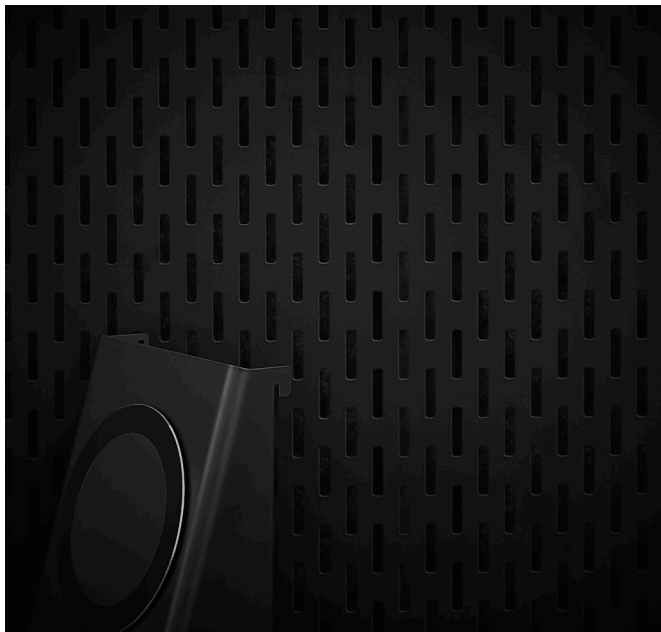

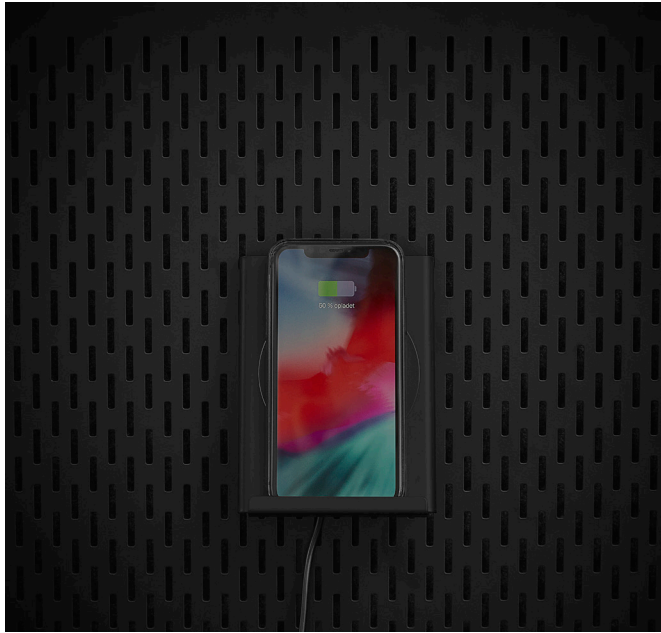

DESIGNED BY **HANS THYGE & CO.** // PRODUCED BY **PJ PRODUCTION**

A STATION FOR YOUR LAPTOP

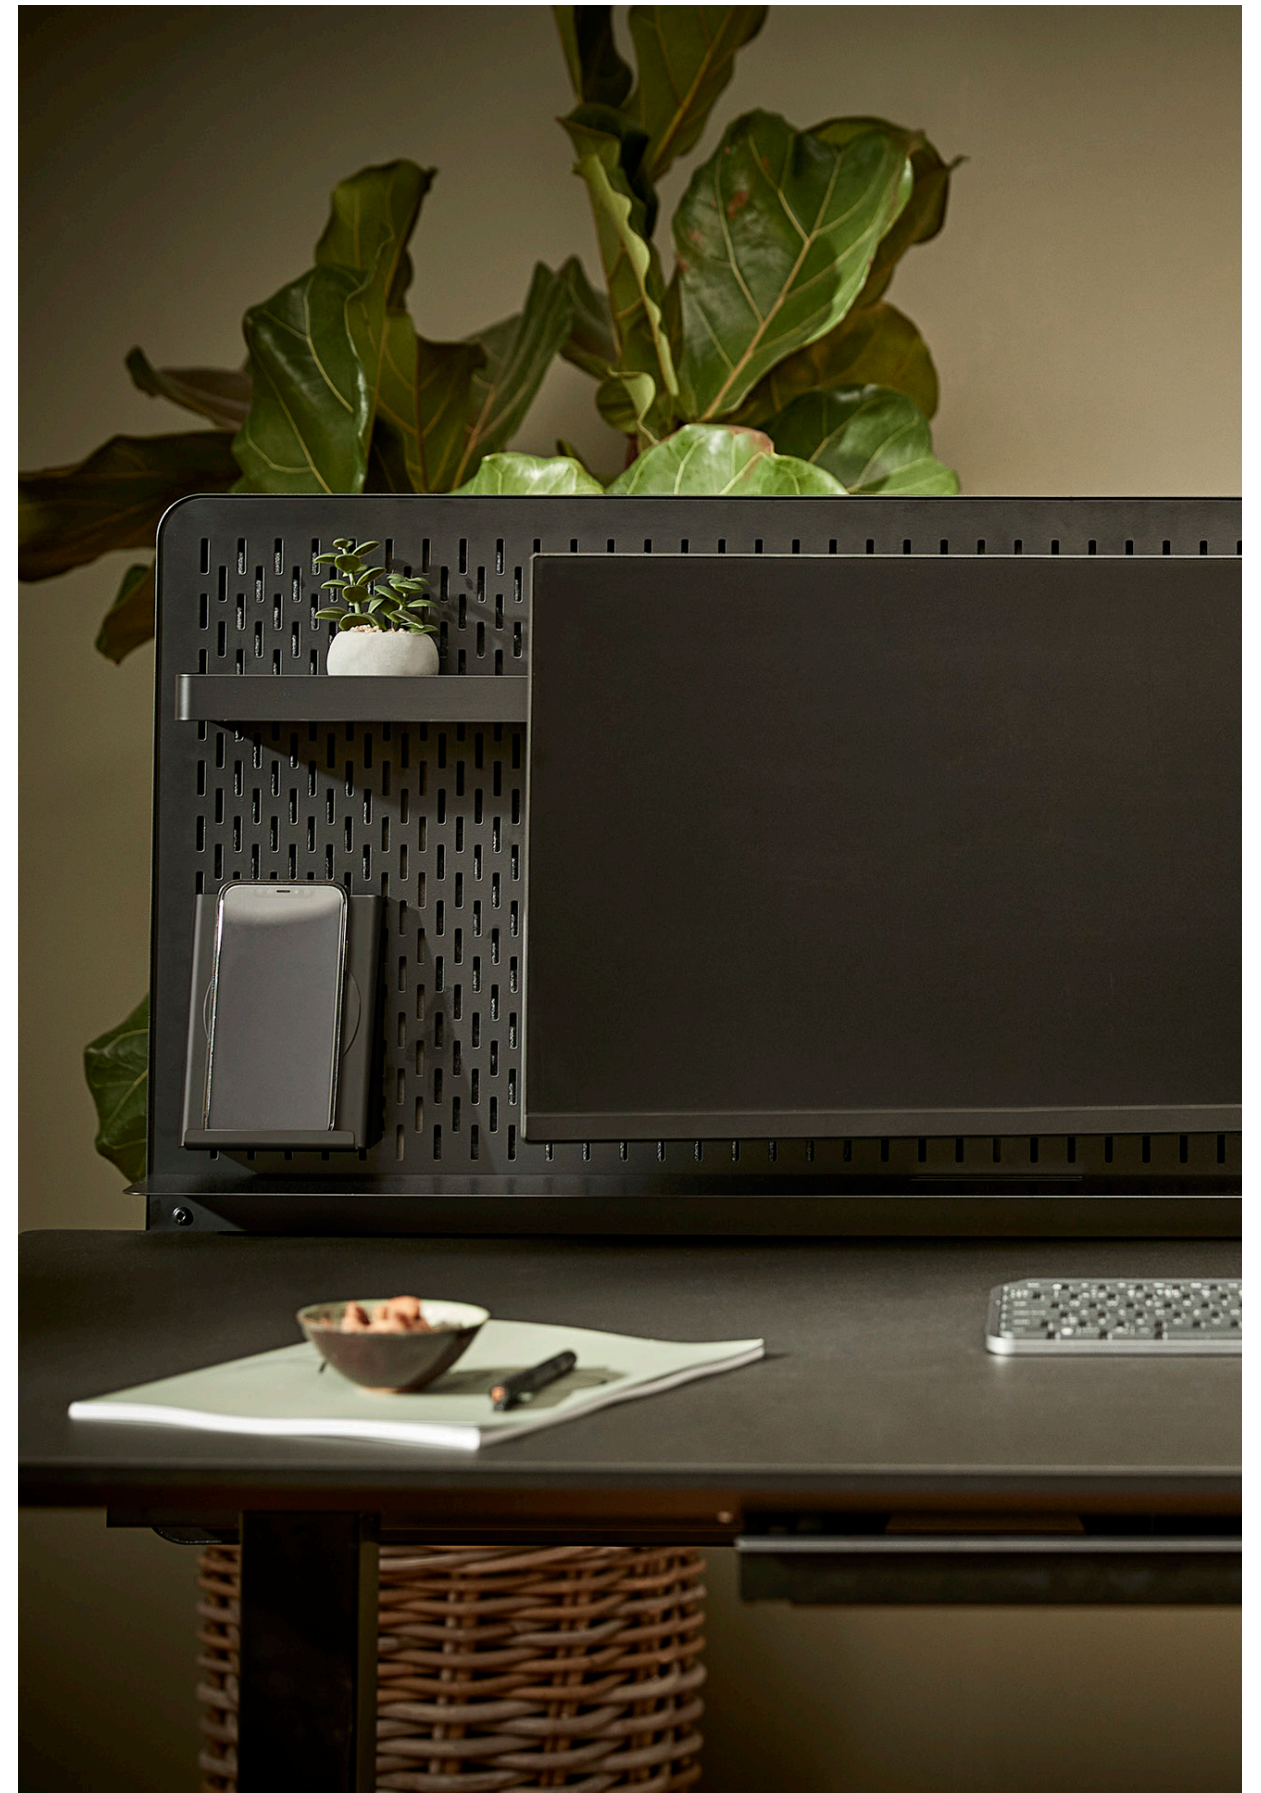

A small simple shelf where your laptop is placed upright after you have connected to your external monitor. The shelf is easily moved around and can be repositioned on the board. However, an ideal placement is behind your screen or close to the cable outlet at the top of the cable tray so you have easy access to your charger.

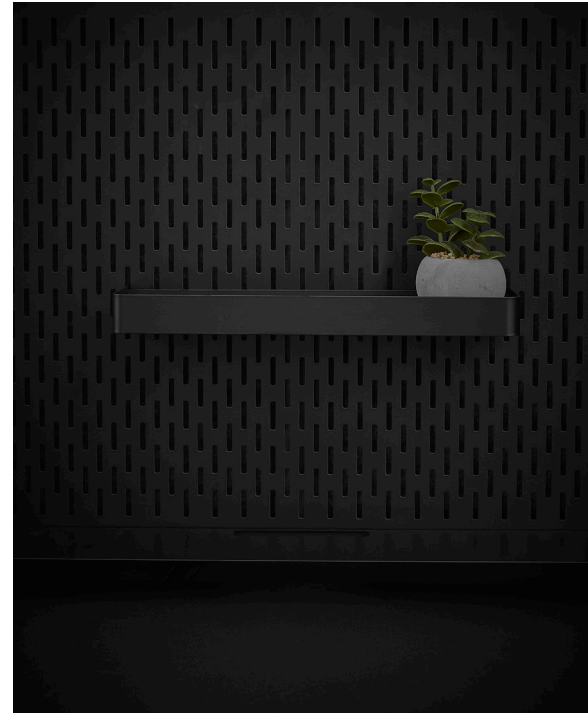

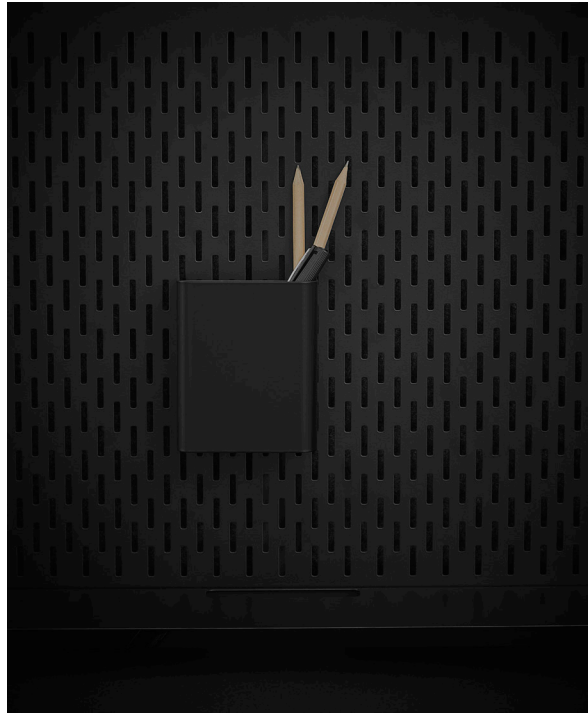

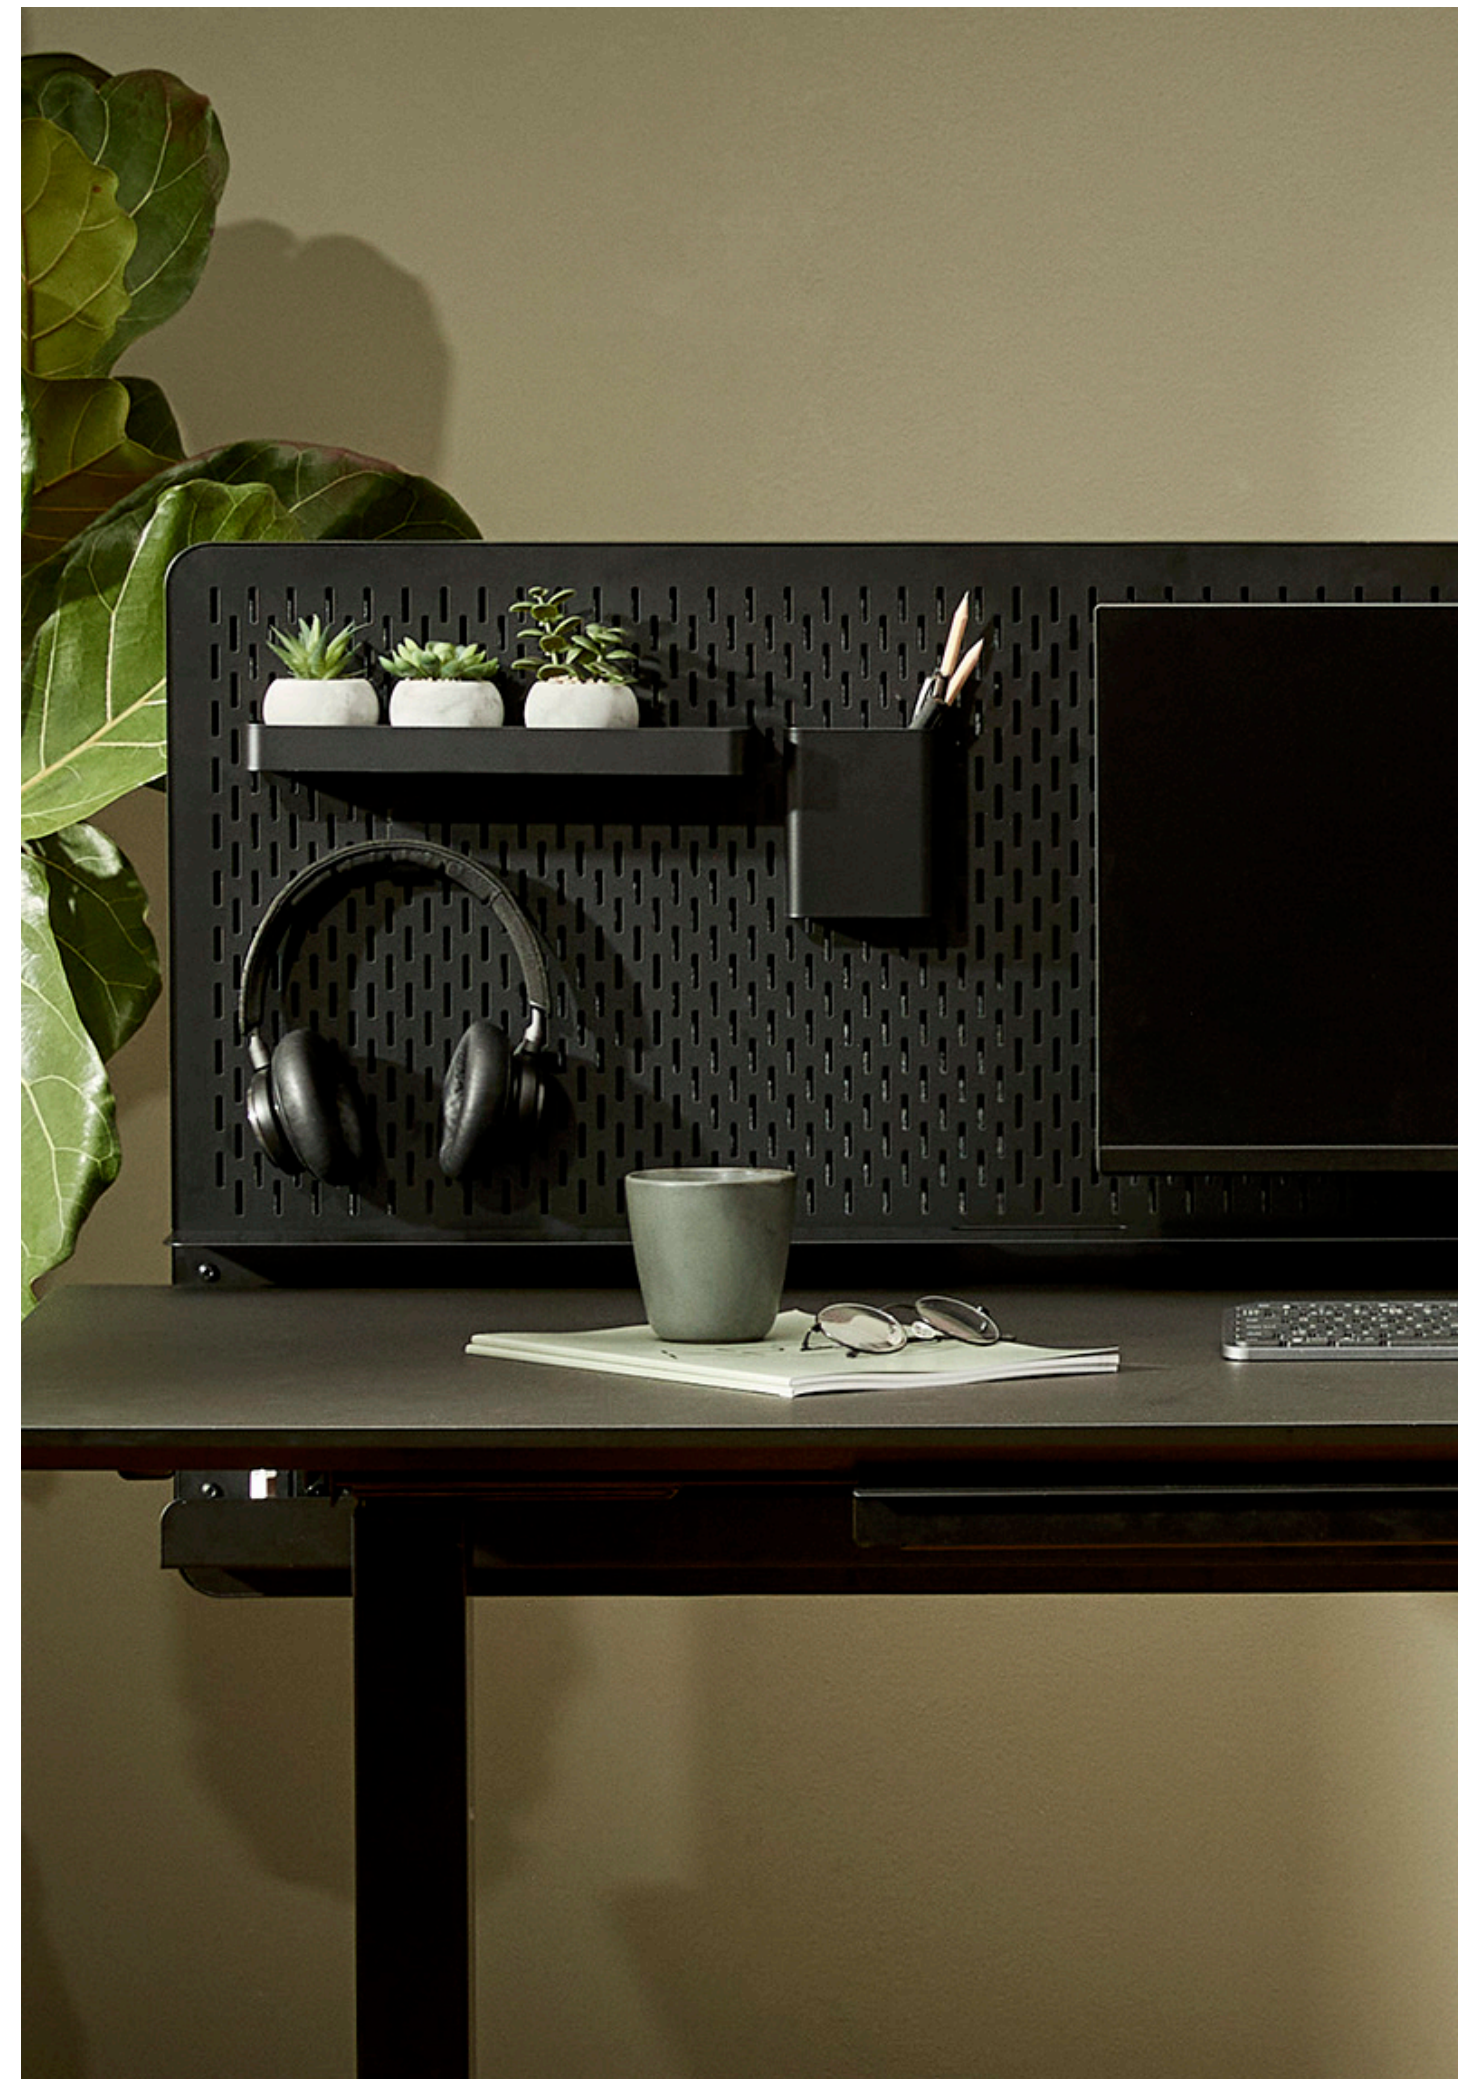

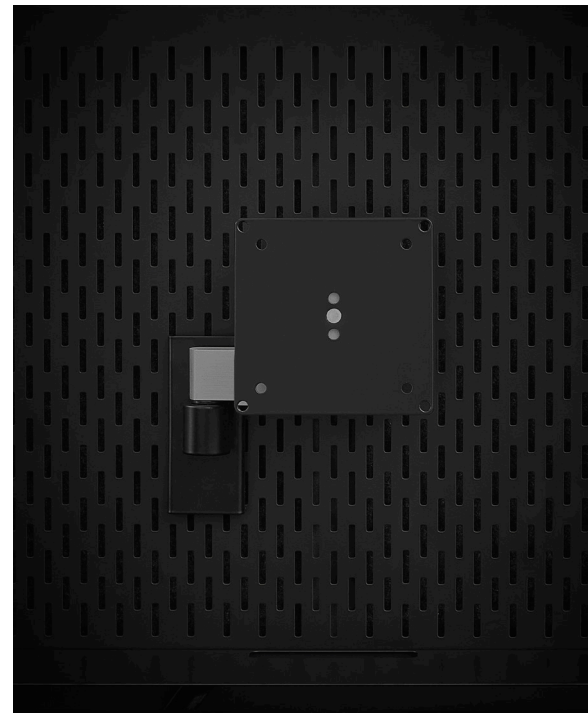

Wireless mobile charger // The charger is easily moved around and repositioned on the board. However, it is recommended that you place it close to the cable harness at the top of the cable tray. This hides the cable to the charger. The charger is a 10 watt wireless charger that fits all newer smart phones.

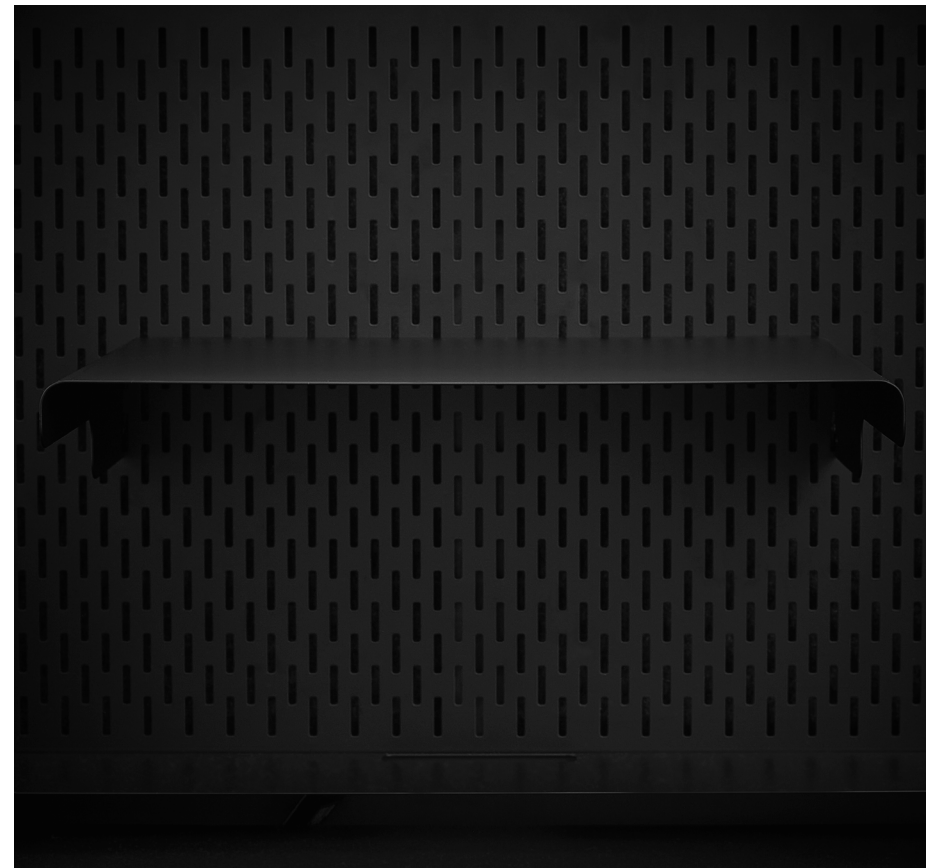

MIX AND MATCH YOUR MODULES

A SHELF WITH MULTIPLE PURPOSES

The shelf has two functions: it works as a tray for paper or magazines, but if you turn it over, it becomes a shelf that fits a laptop of max 16 inches. If you place several on top of each other, the modules act as a letter tray that seems to float above the surface of the table.

Our first upcycled alternative

APTO FELT COLLECTION

FROM PROBLEM TO POSSIBILITY

Did you know that more than 8.3 billion tonnes of plastic have been produced worldwide since the 1950's? And that as much as 9% of this plastic has ended up in the world's oceans after use? Fortunately, awareness has been raised about this. With APTO, we strive to help solve this problem and turn marine waste into valuable products. Our vision for the future is that we will have an upcycled alternative to all our product categories.

Our first product in the collection was the felt drawer and due to the success of this drawer, we have expanded the range of felt products for the whole office. We use felt in our CLAMP COLLECTION and ADAPT COLLECTION and some felt products can also be found in THE APTO MULTI CLAMP COLLECTION.

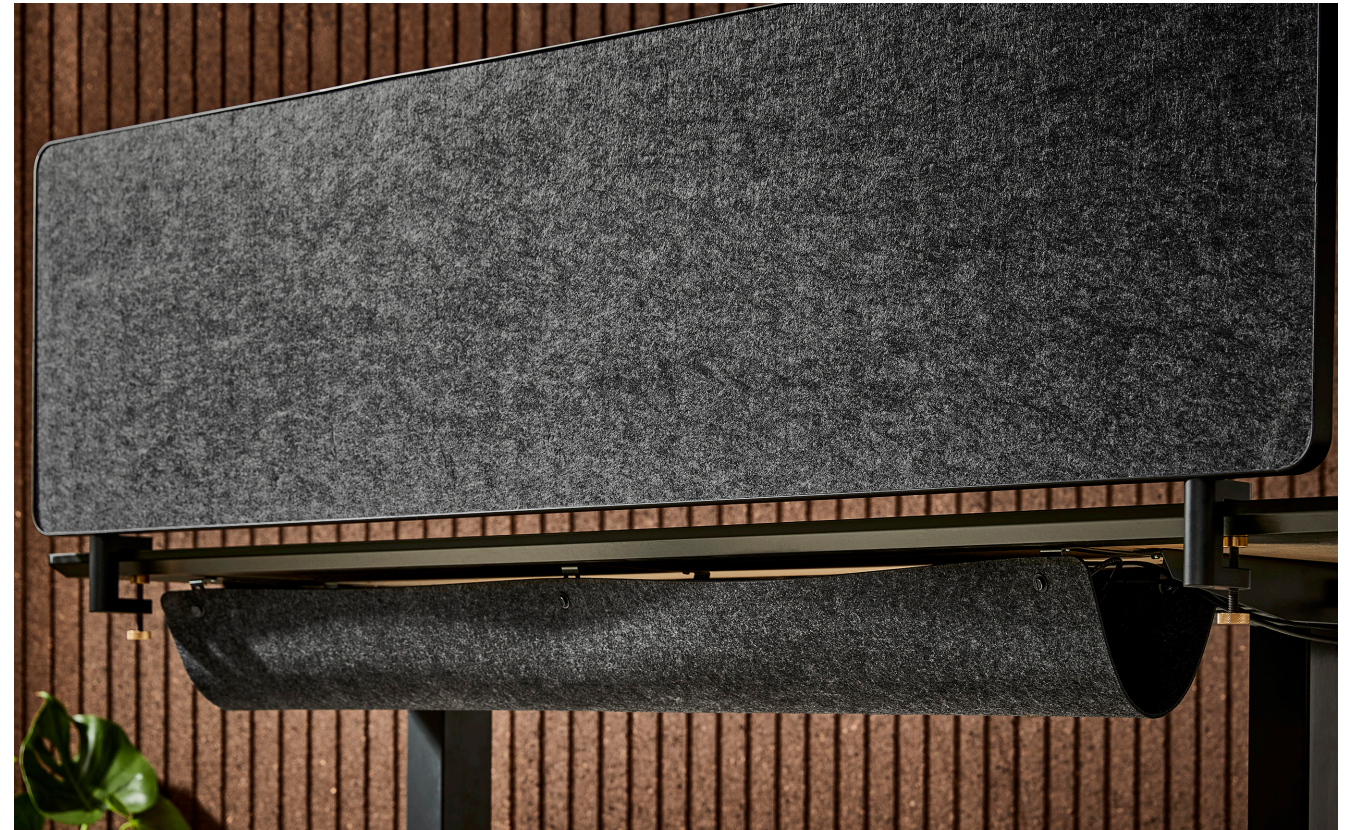

The felt is made of 70% upcycled plastic bottles from the ocean. The felt also functions well in the office due to its sound absorbing properties (Class b).

DESIGNED BY **HANS THYGE & CO.** // PRODUCED BY **PJ PRODUCTION**

We have a burning desire to turn waste into valuable products. One of the products that is produced from recyclable plastic is this aesthetic felt drawer. The felt is made of 70% upcycled plastic bottles from the ocean.

The design of the drawer is organic - both when the drawer is opened and closed. The ball bearings are hidden out of the way so they don't disrupt. Despite the discreetness of the drawer, an instinctively powerful and stylish look is created in any office environment.

HAVE A CLOSER LOOK

Around the felt screen we have designed a metal frame, in matt black lacquering. The frame is resistant to bumps and features beautiful lines.
